Chameleon Solar Stake

Solar powered color-changing light stick

Operates automatically during nightfall

1. CONTENTS

Toppers
Upper Stake
Lower Stake
Rechargeable Battery

2. LOCATION

The solar panel should be placed in an area that gets direct sunlight and is free from cover or shade.

Do not place solar stake near other light sources such as streetlights or porch lights.

The solar panel should not be covered or obstructed from sunlight.

Do not place solar panel unit in water.

3. USER ADVICE

Do not put pressure on the solar panel while installing.

The LED light is integrated into the product. It cannot be replaced.

The batteries used are standard rechargeable Ni-Mh AAA – 600 mAh capacity.

This product is for outdoor use only.

4. ASSEMBLY

Check that the LED is secure in its socket.

Insert the rechargeable battery into the upper stake as marked (+ -) on the housing.

Screw in the lower stake to the upper stake.

Screw in the acrylic topper to the socket.

Place the garden stake into the ground in a sunny location.
